

Virox Healthcare's New Website Offers Many Useful Resources for Medical Device and Surface Disinfection

Virox Healthcare, a U.S. division of Virox Technologies, Inc., has recently launched a new website for the U.S. medical industry which provides easy access to Accel[®] surface disinfectant cleaner product information, resources related to surface disinfection concerns, and a variety of methods and media to keep you apprised of new developments in medical device and surface disinfection.

Oakville, Ontario, Canada – December 18th, 2013 – Accel[®] hospital grade surface disinfectants, and the patented chemical technology it uses, Accelerated Hydrogen Peroxide[®] (AHP[®]), have taken U.S. medical facilities by storm, since its EPA registration in 2006. Because of this huge growth of interest and use, Virox Healthcare has launched a new website which meets the needs of infection preventionists and environmental services professionals, and others who are interested in finding out more about the Accel product line, and infection control in general.

Highlighted on the new website, www.viroxhealthcare.com, is the Accel product line of surface cleaners with patented AHP[®] technology, which are cleaner, faster, responsible and sustainable. Resources are available for evaluating Accel against a facility's current surface disinfectant, and usage instructions in a variety of media can help facilities gain the maximum benefit of using Accel in their surface disinfection and cleaning program. In addition, the website also offers visitors easy ways to subscribe to Virox Technologies' informative communications about products and new developments in medical device and surface disinfection, including the *Virox Insights* blog, which discusses the benefits of Accel products, the popular *Talk Clean To Me* blog, plus Twitter, Facebook, LinkedIn and more.

Accel surface disinfectants have many benefits that make it the ideal disinfectant product:

- **Cleaner:** Accel[®] penetrates dirt to clean thoroughly and has been proven to effectively disinfect even in the presence of soil.
- **Faster:** The broad-spectrum RTU formula disinfects in 1 minute for bacteria and *viruses, including *Norovirus, and the broad-spectrum Concentrate formula disinfects in 5 minutes for bacteria and *viruses (including *Norovirus).
- **Responsible:** Accel TB RTU and Accel Concentrate (at in-use dilution) feature a 0/0/0 HMIS human safety rating, and an EPA Category IV hazard rating. Its active ingredient (hydrogen peroxide) degrades into water and oxygen, creating minimal impact upon the environment.
- **Sustainable:** The AHP[®] chemistry used in Accel contains no ethyl alcohol (ethanol), so Accel[®] stays wet on a surface longer for effective disinfection and cleaning with only one application, making Accel[®] easier and more cost-effective to use than most other surface disinfectants.

For more information about Virox Healthcare and the Accel[®] surface disinfectant cleaner product line, please visit www.viroxhealthcare.com. Accel[®] surface disinfectants are immediately available and are registered trademarks of Virox Technologies, Inc.

Virox Technologies, Inc. is the creator of the Accelerated Hydrogen Peroxide[®] (AHP[®]) disinfection and cleaning technology and is the manufacturer of many sterilants, cleaners, hand hygiene products, and disinfectants, including Accel[®] surface disinfectant cleaners. Virox Technologies, Inc. sells to the clinical, janitorial and sanitation, dental, and veterinary markets in the U.S., Canada, and Europe.
