

US EPA APPROVED DISINFECTANTS FOR COVID-19

Accelerated Hydrogen Peroxide® (AHP®) disinfectant products are available for professional use via commercial channels only.

Accelerated Hydrogen Peroxide® (AHP®) Surface Disinfectants Listed by Industry:

DENTAL

OPTIM 33TB RTU liquid
Optim 33TB Wipes
Optim 1 Wipes

[WHERE TO BUY](#)

SALONS & SPAS (PROFESSIONAL BEAUTY)

Rejuvenate RTU liquid
Rejuvenate Wipes
Rejuvenate Concentrate

[WHERE TO BUY](#)

COMPANION ANIMAL

Rescue RTU liquid
Rescue Wipes
Rescue Concentrate

[WHERE TO BUY](#)

FARM ANIMAL

Intervention Wipes
Intervention RTU liquid
Intervention Concentrate

[WHERE TO BUY](#)

HEALTHCARE / INDUSTRIAL / INSTITUTIONAL

OxivirTB RTU Oxivir 1
Oxivir TB Wipes Oxivir 1 Wipes
Oxivir Five 16 Concentrate

[WHERE TO BUY](#)

CLEAN ROOMS & CRITICAL ENVIRONMENTS

PREempt Concentrate
PREempt RTU
PREempt Wipes

[WHERE TO BUY](#)

COMPARATIVE MEDICINE

Peroxigard RTU Liquid
Peroxigard Wipes
Peroxigard Concentrate

[WHERE TO BUY](#)

AVIATION

PREempt RTU
PREempt Wipes

[WHERE TO BUY](#)

MOLD REMEDIATION

Restorox RTU

Accelerated Hydrogen Peroxide® (AHP®) efficacy against SARS-CoV-2, the virus which causes COVID-19 disease

SARS-CoV-2, the causative agent of the ongoing COVID-19 pandemic, is an emerging pathogen; therefore, neither the EPA nor Health Canada have an approved test method for determining or allowing disinfectant efficacy product label claims. In cases of Emerging Pathogens such as SARS-CoV-2, the EPA implements the Emerging Viral Pathogens Guidance for Antimicrobial Products. This guidance utilizes an organism hierarchy to identify effective products for use with emerging pathogens and to permit registrants to make limited statements against such pathogens. Coronaviruses are enveloped viruses, which are among the easiest organisms for disinfectants to kill or inactivate. The following criteria are used to determine efficacy of a disinfectant upon activation of the Emerging Pathogen Rule:

1. The product must be a hospital or broad-spectrum disinfectant product registered with EPA.
2. For an emerging enveloped virus, the product must have acceptable efficacy data previously submitted to and reviewed by the Agency against one non-enveloped virus (e.g. Poliovirus).

As the manufacturer of all AHP® surface disinfectants (concentrates, ready-to-use and premoistened wipes), we would like to ensure you that our AHP®-based disinfectants fulfill these criteria and are included on the EPA's List N: Disinfectants for Use Against SARS-CoV-2: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>.

To find an AHP®-based disinfectant that is approved for use against SARS-CoV-2 as part of a facility's COVID-19 infection prevention and control plan, please refer to the following link: https://virox.com/files_docs/source/CoronavirusProducts_USA.pdf

Should you require any further information, please do not hesitate to contact me directly at 1-800-387-7578 ext. 118 or via email at nkenny@virox.com.

Best Regards,

Nicole Kenny, HBSc., Assoc Chem
Vice President, Professional and Technical Services
