FOR IMMEDIATE RELEASE

Rescue Disinfectants Named the First Official Disinfectant of the Viticus Group, Setting New Standards of Infection Prevention in Animal Health Education

Oakville, Ontario – Oct 28, 2025 – In a shared commitment to advancing education, safety, and innovation in animal health, Virox Technologies, the makers of Rescue® Disinfectants, and the Viticus Group, a nonprofit organization and leading provider of innovative veterinary and human healthcare education worldwide, are excited to announce a formal partnership that establishes Rescue Disinfectants as the first Official Disinfectant of the Viticus Group.

This partnership will ensure that all Viticus Group's training facilities and state-of-the-art educational facilities maintain the highest levels of infection prevention and biosecurity. As the leading disinfectant for veterinary, shelter and pet care settings, Rescue continues to redefine what safety, speed, and efficacy mean in professional animal care environments.

"We believe world class education demands world class biosecurity and that's why we're partnering with Virox," said Dr. Anthony Pease, chief veterinary medical officer (CVMO), Viticus Group. "This alliance ensures every Viticus Group training lab uses Rescue Disinfectant, giving our participants the peace of mind to focus on their hands-on skills in the safest, cleanest and most effective learning environment possible."

"This partnership is a testament to our shared dedication to advancing veterinary education and safety," said Lee Nesbitt, President – Commercial Markets, Virox Technologies. "As the official disinfectant of the Viticus Group, we're ensuring that future veterinary professionals train in environments that reflect the highest standards of infection prevention. Together, we're advancing infection prevention standards that support better outcomes in animal health."

The partnership will feature the exclusive use of Rescue Disinfectants in Viticus Group's Animal Health facilities, alongside joint initiatives to promote best practices in cleaning and disinfection. Together, Virox Technologies Inc. and Viticus Group are setting a new benchmark for cleanliness, safety, and scientific rigor in hands-on education.

About Viticus Group

As powerful innovations alter the world of animal and human health, Viticus Group (formerly WVC) is the leading provider of innovative veterinary and human healthcare education worldwide. As the largest freestanding combined animal and human hands-on (bioskills) training and continuing education organization in the world, Viticus Group offers continuing education at two cutting-edge campuses, presenting a variety of courses and providing access to specialized surgical training for both veterinary and human health professionals.

About Virox Technologies, makers of Rescue® Disinfectants

With one of the fastest contact times on the market, Rescue Disinfectants deliver superior performance while effectively eliminating a wide range of pathogens, including Feline Calicivirus, Ringworm, and Parvovirus without sacrificing human and animal safety.

As the makers of Rescue, Virox Technologies Inc. is a chemical engineering and disinfectant innovator who set a new standard in disinfection in 1998 with the creation of Accelerated Hydrogen Peroxide® (AHP®). With our latest patented disinfectant technology, Citr-IQ®, we continue to innovate and deliver the world's safest, most effective, and eco-conscious disinfectants while maintaining our commitment to providing the latest in disinfection and infection prevention education. Our trusted technologies and products are relied on in more than 70 countries across human and animal health industries, eliminating dangerous pathogens and providing a safer and greener alternative for people, animals, and the planet.
